Who This Guide Is For

This guide is for job seekers who want to land real, high-paying roles (not gigs or agencies) by mastering skills that employers actually hire for in 2026. If you want to get out of low-wage work, skip the degree, and get into jobs that pay \$60K+ — especially in AI automation, SaaS support, or process operations — this is for you.

▶ **MODULE 02**

Opportunity Snapshot

\$60-90K

Typical salary for AI automation, SaaS onboarding, or process ops roles

0-3 months

Time to qualify with focused self-study (see roadmap)

No degree

Most roles require skills, not a diploma

HighLevel, Zapier, GTD

Top tools & frameworks employers want

Thousands

Open jobs on Indeed/LinkedIn for these skills

▶ **MODULE 03**

Why This Job Is Worth Looking At

Employers are desperate for people who can set up, automate, and support business processes using SaaS and AI tools. These roles pay well, are often remote, and don't require a computer science degree. The real edge: most applicants lack hands-on experience with the

exact tools (like GoHighLevel, Zapier, or GTD systems) that businesses use daily. If you can show real-world skill, you stand out immediately.

▶ **MODULE 04**

What The Job Actually Does

You'll help companies automate client onboarding, appointment scheduling, and follow-ups using platforms like GoHighLevel, Zapier, or similar SaaS. Typical tasks include setting up automated workflows, troubleshooting issues, training staff, and optimizing processes for efficiency. Some roles are titled 'AI Automation Specialist', 'SaaS Onboarding Specialist', or 'Business Process Coordinator'.

▶ **MODULE 05**

Pay Potential — The Real Numbers

Role Title	Reported Salary (USD)	Source
AI Automation Specialist	\$65,000 - \$90,000	Indeed, 2024
SaaS Onboarding Specialist	\$60,000 - \$85,000	LinkedIn Jobs
Business Process Coordinator	\$58,000 - \$80,000	Glassdoor
Workflow Automation Analyst	\$62,000 - \$88,000	ZipRecruiter

Entry-level roles may start closer to \$55-60K, but with 12-24 months of hands-on experience, \$75K+ is realistic (source: creator transcript, 'This Freelancer Productivity System Made Me \$22K This Month').

▶ **MODULE 06**

Requirements

Requirement	Details
Education	No degree required (but some roles may prefer AA/BA)
Experience	Hands-on with SaaS tools (e.g., GoHighLevel, Zapier, Notion)
Certifications	Optional, but see below
Soft Skills	Client communication, troubleshooting, process thinking

► MODULE 07

Skills Needed

- 1 GoHighLevel or similar SaaS platform setup
- 2 Zapier or Make.com workflow automation
- 3 David Allen's Getting Things Done (GTD) productivity framework
- 4 Client onboarding and support (email, chat, video calls)
- 5 Basic data analysis (Excel, Google Sheets)
- 6 Process documentation (Notion, Confluence, or similar)

► MODULE 08

Certifications or Licenses

Certification	Provider	Cost	Notes
GoHighLevel Certification	GoHighLevel Academy	Free-\$99	Official SaaS onboarding cert
Zapier Certified Expert	Zapier	Free	Demonstrates workflow automation skills
GTD Fundamentals	David Allen Co.	\$99	Shows productivity/process mastery
Google Data Analytics Cert	Coursera	Free-\$49/mo	Optional, for data-heavy roles

▶ MODULE 09

Beginner Roadmap

- 1 Sign up for a free GoHighLevel trial and complete their onboarding tutorials.
- 2 Create a Zapier account and build 3 sample automations (e.g., calendar booking, email follow-up).
- 3 Read the summary of 'Getting Things Done' (GTD) and implement the capture/organize steps using Bear or Notion.
- 4 Document your process in a Notion page (screenshots, step-by-step).
- 5 Offer to automate a simple workflow for a friend or small business (free or for a testimonial).
- 6 Apply for entry-level SaaS support or onboarding roles using your documented projects

7-Day Action Plan

- 1 Day 1: Register for GoHighLevel and Zapier free trials.
- 2 Day 2: Complete GoHighLevel's onboarding checklist and watch their official YouTube tutorials.
- 3 Day 3: Build a Zapier workflow that connects Google Forms to Gmail (auto-send a thank you email).
- 4 Day 4: Read the GTD method summary and set up a digital inbox using Bear or Notion.
- 5 Day 5: Automate your own calendar bookings (e.g., Calendly + Google Calendar + Zapier).
- 6 Day 6: Write a 1-page case study of your workflow (with screenshots).
- 7 Day 7: Update your resume with new skills and apply to 5 jobs using the keywords below.

30-Day Action Plan

- 1 Week 1: Complete GoHighLevel and Zapier sample projects; document everything.
- 2 Week 2: Take a free GTD or SaaS onboarding course (see Coursera, GoHighLevel Academy).
- 3 Week 3: Offer to automate a process for a real business or nonprofit (even unpaid for proof).
- 4 Week 4: Apply to 20+ jobs using your portfolio and the copy/paste script below; prep for interviews using talking points.

Insider Secrets & Shortcuts

- 1 Use GoHighLevel's 30-day free trial to build real automations — then screenshot your dashboard as proof for employers. (Source: 'How to Get Paid Every Month for Connecting Local Business Clients')
- 2 Don't just list 'automation' — name exact tools (GoHighLevel, Zapier, Bear, Notion) on your resume. Recruiters search for these keywords. (Source: 'This Freelancer Productivity System Made Me \$22K This Month')
- 3 Apply the 'GTD capture' method to your own job search: every lead, task, or follow-up goes into Bear or Notion, not your head. This keeps you organized and impresses hiring managers when you show your system. (Source: GTD transcript)
- 4 For interviews, bring a 1-page case study of a workflow you automated (even for yourself or a friend). Most applicants talk, few show real proof.
- 5 Avoid the common mistake of overwhelming employers with every tool you know. Focus on 1-2 core SaaS platforms and show depth, not just breadth. (Source: 'The Truth About Starting GoHighLevel SaaS Business in 2026')

Exact Resume Keywords

- 1 GoHighLevel
- 2 Zapier
- 3 Workflow automation

- 4 icki.com / @jobhecki SaaS onboarding

- 5 AI process automation

- 6 Getting Things Done (GTD)

- 7 Notion

- 8 Client onboarding

- 9 Process documentation

- 10 Remote support

▶ **MODULE 14**

Copy/Paste Application Script

▶ **MODULE 15**

Interview Talking Points

- 1 Describe a workflow you automated using GoHighLevel or Zapier (specifics: what, how, result).

- 2 Explain your personal productivity system (GTD, Bear/Notion) and how it improves your work.

- 3 Share how you troubleshoot SaaS issues and communicate solutions to non-technical users.

- 4 Discuss your approach to onboarding new clients or users to a SaaS platform.

- 5 Mention your documented portfolio and willingness to demo a real automation live.

▶ **MODULE 16**

Red Flags / Scams To Avoid

Warning

Be cautious of job listings that require upfront payment for 'training' or promise guaranteed income. Real employers pay you, not the other way around. Avoid vague job titles like 'automation ninja' or 'remote process wizard' — stick to roles with clear, searchable titles (see above).

► MODULE 17

Source Notes

""The software doesn't get results, systems do. That's why when you start your free trial through my link, I'm giving you my entire system completely free. \$10,000 plus worth of assets, the scripts, the templates, the frameworks behind every campaign and funnel that's actually worked.""

THE JOBHACKI ARSENAL

This guide is 1% of what members get

The community unlocks the tools that do the heavy lifting for you:

OmniCut

Upload any video — get back a timestamped, cut-by-cut edit blueprint: hooks, vocal cues, effects and animation calls, all mapped to the viral frameworks behind our own content. You (or your AI editor) just follow the map.

JobHacki Resume Builder

Our exact one-page, recruiter-tested template — auto-built from your LinkedIn in minutes, exported as an editable doc + PDF.

JobHacki Readiness Simulator

Paste any job link. Get tested on what the role actually requires, see your readiness score, and get the fastest study path to close the gaps.

Atlas Directory

Every guide and career path we publish — refreshed by 24/7 AI researchers so you never act on stale info.

WHAT EACH TOOL ACTUALLY DOES

OmniCut

OmniCut watches your entire video the way an elite editor would — every frame, the full transcript, your offer and what you're actually selling — then runs it through the viral frameworks behind our own content. What you get back is a timestamped editing score: your video chopped into 10-second sequences, each with exact vocal cues, audio cues, effect calls and animation directions. Copy a sequence, paste it into Gemini Omni, and generate that cut — then the next, then the next, until the whole edit is done. Runs as a custom GPT inside ChatGPT (you'll need a ChatGPT account), purpose-built for Gemini Omni video editing the day it drops.

JobHacki Resume Builder

Drop in your LinkedIn (or paste your experience) and it rebuilds everything into the exact one-page format we use: tight summary line, education with the details recruiters scan for, metric-driven experience bullets, and the 10-category skills stack that beats ATS keyword filters. Out comes a polished PDF plus a fully editable doc — change any line later without starting over. Single-industry and multi-industry versions included.

JobHacki Readiness Simulator

Paste a real job posting link. The simulator breaks down what that role actually demands — skills, tools, terminology, scenarios — and tests you on it: multiple choice, written answers, even voice roleplay for interviews and sales calls. You get a Readiness Score out of 100 across skill match, tool match, communication and interview readiness, plus the exact study plan to close your gaps — linked straight to the guides, certs and resources that fix them.

Atlas Directory

The full living library: 100+ grounded, step-by-step playbooks across AI businesses, careers, trades, healthcare paths and side income — every one built from people who actually did it, never theory. Our AI researchers monitor hundreds of creators and sources around the clock, so tools, pay data and methods stay current. Search it, filter it, read online or download any guide as a PDF.
