- Why This Job Is Worth Looking At
- What The Job Actually Does
- Pay Potential — The Real Numbers
- Requirements

▶ **MODULE 01**

Who This Guide Is For

This guide is for job seekers who want to go beyond basic job boards and use automation, AI, and research tools to find and land real, full-time jobs. If you're tired of sending out generic applications and want to use the same systems as top recruiters and lead generators, this is for you.

▶ **MODULE 02**

Opportunity Snapshot

\$60K–\$120K

Typical pay for roles found via advanced search
(source: job board data)

1–2 weeks

Time to set up a full automation workflow
(source: n8n, Apify tutorials)

5–10x

Increase in leads/applications processed per week
(source: creator demos)

**Google Sheets,
Apify, n8n, Instantly**

Core tools used by insiders (source: transcripts)

▶ **MODULE 03**

Why This Job Is Worth Looking At

Most job seekers use the same 2–3 job boards and get lost in the crowd. By using automation and scraping tools, you can find hidden jobs, reach hiring managers directly, and personalize your outreach at scale. This approach is used by top lead generators and can help you land interviews for roles that never even get posted publicly.

▶ MODULE 04

What The Job Actually Does

Roles landed through these advanced job search tactics include:

- Data Analyst (also posted as Business Data Analyst, Data Scientist, Reporting Analyst, Data Specialist, Analytics Consultant)
- Marketing Coordinator (also: Marketing Assistant, Digital Marketing Specialist, Campaign Coordinator, Brand Assistant, Marketing Associate)
- IT Support Specialist (also: Help Desk Technician, Service Desk Analyst, Desktop Support, Technical Support Specialist)
- Project Manager (also: Program Coordinator, Project Coordinator, Operations Manager, Implementation Specialist, Delivery Manager)
- Customer Success Manager (also: Client Success Specialist, Account Manager, Customer Experience Manager, Relationship Manager)

You use job search websites, scraping tools, and AI to identify openings, extract contact info, and send personalized applications—often before the competition even sees the posting.

▶ MODULE 05

Pay Potential — The Real Numbers

Source-reported pay for roles commonly landed with these tactics:

jobhacki.com · @jobhacki

- Data Analyst: \$65K–\$110K (Glassdoor, Indeed)
- Marketing Coordinator: \$55K–\$85K
- IT Support Specialist: \$60K–\$90K
- Project Manager: \$70K–\$120K
- Customer Success Manager: \$65K–\$105K

Entry-level roles may start lower (\$45K–\$55K), but with this approach, you can target higher-paying, less competitive jobs and ramp up in 12–18 months.

▶ **MODULE 06**

Requirements

Requirement	Details
Education	Varies by role; most require a bachelor's degree or equivalent experience
Experience	Entry-level to 2+ years for most roles
Tech setup	Laptop/desktop, stable internet, Google account
Tools	Google Sheets, n8n or similar workflow automation, Apify (for scraping), OpenAI API (optional for advanced personalization)

▶ **MODULE 07**

Skills Needed

- Basic spreadsheet skills (Google Sheets)
- Ability to follow step-by-step tech tutorials

- (Optional) Familiarity with APIs and automation tools like n8n or Zapier

▶ **MODULE 08**

Certifications or Licenses

Role	Recommended Certs
Data Analyst	Google Data Analytics Certificate, CompTIA Data+ (optional)
IT Support	CompTIA A+, Google IT Support Certificate
Project Manager	CAPM, PMP (for senior roles)
Marketing	Google Analytics, HubSpot Inbound Marketing (optional)
Customer Success	None required, but CX/CRM certs help

▶ **MODULE 09**

Beginner Roadmap

- 1 Pick 1–2 job titles and alternate titles to target (see above).
- 2 Set up a Google Sheet to track job postings, company names, contacts, and application status.
- 3 Sign up for n8n (free or hosted via Webspaces Kit) or a similar workflow tool.
- 4 Connect Apify to n8n to automate scraping of job boards or company career pages.
- 5 Use OpenAI or Gemini to summarize job descriptions and generate personalized intro lines.
- 6 Collect hiring manager emails using tools like AnyMailFinder (API integration).

- 7 Send personalized applications using Instantly or a similar cold email tool.

▶ **MODULE 10**

7-Day Action Plan

- 1 Day 1: Identify 3–5 job titles and their alternate titles using LinkedIn and Indeed.
- 2 Day 2: Set up your Google Sheet with columns for company, job title, contact, status.
- 3 Day 3: Register for n8n (or Webspaces Kit) and Apify. Get your API keys.
- 4 Day 4: Import a free job scraping workflow template from Webspaces Kit or n8n community.
- 5 Day 5: Connect Google Sheets, Apify, and (optionally) OpenAI to your workflow.
- 6 Day 6: Run your workflow to pull 50–100 job leads into your sheet.
- 7 Day 7: Draft and send your first batch of personalized applications using the script below.

▶ **MODULE 11**

30-Day Action Plan

- 1 Week 1: Refine your workflow to filter for jobs with direct hiring manager contacts.
- 2 Week 2: Add a step to summarize each job description and generate a custom intro using OpenAI.
- 3 Week 3: Track responses and follow up with a second, even more personalized message.
- 4 Week 4: Analyze which types of jobs and companies respond best; double down on

those.

- 5 By day 30: You should have applied to 100+ jobs with high-quality, personalized outreach—expect a reply rate of 5–10% (source: creator demo).

► **MODULE 12**

Insider Secrets & Shortcuts

- 1 Use Apify with n8n to scrape job listings and hiring manager details directly from company career pages—this bypasses crowded job boards (source: 'How I Extracted 100+ Leads from Google Maps Using AI Agent').
- 2 Automate personalized intro lines for each application using OpenAI or Gemini—creators report 5–10% reply rates vs. 1–2% for generic messages (source: 'I Deep-Personalized 1000+ Cold Emails Using THIS AI System').
- 3 Store all leads and application statuses in Google Sheets and pin your data in n8n to avoid API rate limits (source: creator walkthrough).
- 4 Use AnyMailFinder API to verify hiring manager emails before sending—reduces bounce rates and increases deliverability (source: n8n workflow demo).
- 5 If you find a company running ads but with a poor website or job page, reach out directly—these are often neglected by recruiters and have less competition (source: 'WARNING: do not sell websites, sell smart “talking websites”').
- 6 Always filter for jobs posted in the last 3–5 days—older postings are often flooded with applicants (source: creator outreach scripts).

► **MODULE 13**

Exact Resume Keywords

jobhacki.com · @jobhacki

Include these keywords in your resume to match ATS filters for each role:

- Data Analyst: SQL, data visualization, dashboard, Excel, Python, reporting, analytics, Tableau, Power BI
- Marketing Coordinator: campaign, digital marketing, content creation, analytics, CRM, HubSpot, Google Analytics
- IT Support: troubleshooting, help desk, ticketing, hardware, software, Active Directory, remote support
- Project Manager: project planning, scheduling, stakeholder, Agile, Scrum, risk management, Jira, Trello
- Customer Success: onboarding, retention, CRM, client communication, feedback, upsell, Zendesk, Salesforce

▶ **MODULE 14**

Copy/Paste Application Script

▶ **MODULE 15**

Interview Talking Points

- "I used workflow automation (n8n, Apify) to identify and research companies that match my skills—this means I'm proactive and tech-savvy."
- "I customized each application with a summary of why I'm a fit, not just a generic resume."
- "I track all my outreach and follow-ups in Google Sheets, so I never miss a step in the process."
- "I'm comfortable with new tools and can automate repetitive tasks—this saves time for your team."

▶ **MODULE 16**

Red Flags / Scams To Avoid

Warning

Avoid any job search tool or website that asks for upfront payment to access basic job listings—legitimate job boards and company career pages are free to browse. Never provide your social security number, bank info, or full address until you have a confirmed offer and have verified the employer. Be wary of roles that promise 'guaranteed' placement or ask you to pay for training before hiring.

▶ MODULE 17

Source Notes

“What this multi-line icebreaker is is it’s an extraordinarily high-quality personalized pitch... this is the sort of thing that routinely gets me 5 to 10% reply rates on my cold email campaigns.”

THE JOBHACKI ARSENAL

This guide is 1% of what members get

The community unlocks the tools that do the heavy lifting for you:

OmniCut

Upload any video — get back a timestamped, cut-by-cut edit blueprint: hooks, vocal cues, effects and animation calls, all mapped to the viral frameworks behind our own content. You (or your AI editor) just follow the map.

JobHacki Resume Builder

Our exact one-page, recruiter-tested template — auto-built from your LinkedIn in minutes, exported as an editable doc + PDF.

JobHacki Readiness Simulator

Paste any job link. Get tested on what the role actually requires, see your readiness score, and get the fastest study path to close the gaps.

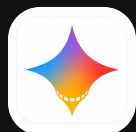

Atlas Directory

Every guide and career path we publish — refreshed by 24/7 AI researchers so you never act on stale info.

Join free today — founding-member pricing locks in before the tools go paid.

WHAT EACH TOOL ACTUALLY DOES

OmniCut

OmniCut watches your entire video the way an elite editor would — every frame, the full transcript, your offer and what you're actually selling — then runs it through the viral frameworks behind our own content. What you get back is a timestamped editing score: your video chopped into 10-second sequences, each with exact vocal cues, audio cues, effect calls and animation directions. Copy a sequence, paste it into Gemini Omni, and generate that cut — then the next, then the next, until the whole edit is done. Runs as a custom GPT inside ChatGPT (you'll need a ChatGPT account), purpose-built for Gemini Omni video editing the day it drops.

JobHacki Resume Builder

Drop in your LinkedIn (or paste your experience) and it rebuilds everything into the exact one-page format we use: tight summary line, education with the details recruiters scan for, metric-driven experience bullets, and the 10-category skills stack that beats ATS keyword filters. Out comes a polished PDF plus a fully editable doc — change any line later without starting over. Single-industry and multi-industry versions included.

JobHacki Readiness Simulator

Paste a real job posting link. The simulator breaks down what that role actually demands — skills, tools, terminology, scenarios — and tests you on it: multiple choice, written answers, even voice roleplay for interviews and sales calls. You get a Readiness Score out of 100 across skill match, tool match, communication and interview readiness, plus the exact study plan to close your gaps — linked straight to the guides, certs and resources that fix them.

Atlas Directory

The full living library: 100+ grounded, step-by-step playbooks across AI businesses, careers, trades, healthcare paths and side income — every one built from people who actually did it, never theory. Our AI researchers monitor hundreds of creators and sources around the clock, so tools, pay data and methods stay current. Search it, filter it, read online or download any guide as a PDF.
