YOU WILL LEARN

- ✓ Who This Guide Is For
- ✓ Why This Job Is Worth Looking At
- ✓ Pay Potential — The Real Numbers
- ✓ Opportunity Snapshot
- ✓ What The Job Actually Does
- ✓ Requirements

▶ **MODULE 01**

Who This Guide Is For

This guide is for job seekers who want to use LinkedIn more strategically and efficiently. If you're tired of sending applications into the void, want to automate tedious parts of the process, or need to stand out in a crowded market, this is for you. Especially relevant for tech, sales, marketing, and operations roles—but the tactics apply to most white-collar job searches.

▶ MODULE 02

Opportunity Snapshot

\$60K–\$120K

Typical salary range for roles landed via LinkedIn (source: LinkedIn, Indeed)

2–4 weeks

Average time to first interview (with automation, source-reported)

0–\$30/mo

Cost for automation tools (N8N, OpenAI, Apify, etc.)

80%+

Of recruiters use LinkedIn as a primary sourcing tool (LinkedIn Talent Solutions)

▶ MODULE 03

Why This Job Is Worth Looking At

LinkedIn is the #1 platform for professional job search, but most applicants use it passively. With the right automations, you can surface hidden jobs, reach decision makers, and personalize outreach at scale—giving you a real edge. These methods are being used by job seekers who report landing interviews in days, not months.

▶ MODULE 04

What The Job Actually Does

You'll be searching for real, posted jobs on LinkedIn—roles like Account Executive, Data Analyst, Customer Success Manager, Operations Coordinator, and more. The difference: you'll use AI and automation to find, research, and contact hiring managers or recruiters directly, often before jobs are flooded with applicants.

▶ MODULE 05

Pay Potential — The Real Numbers

\$60,000–\$120,000

Typical salary range for roles landed via LinkedIn (source: LinkedIn, Glassdoor, Indeed)

\$80,000–\$150,000

For in-demand tech/sales roles (e.g. Account Executive, Product Manager)

\$55,000–\$70,000

Entry-level roles (e.g. Customer Success, Marketing Coordinator)

▶ MODULE 06

Requirements

Requirement	Details
LinkedIn account	Free or Premium (Premium not required for most tactics)
Resume	Optimized for ATS and LinkedIn keywords
Basic computer skills	Comfortable with Google Sheets, browser extensions
Optional: Automation tools	N8N (free/paid), Apify, OpenAI API, Poppy AI, etc.

▶ MODULE 07

Skills Needed

- 1 Research: Ability to find and vet job postings and company info.
- 2 Personalized outreach: Crafting messages that reference specific company needs.
- 3 Basic automation: Using tools like N8N, Apify, or Poppy AI to speed up repetitive tasks.
- 4 Data management: Organizing leads and tracking applications in Google Sheets.
- 5 Communication: Following up with recruiters/hiring managers.

▶ MODULE 08

Certifications or Licenses

Certification/License	Is it required?	Where to get it
None required	No	N/A
Optional: LinkedIn Learning Certs	No, but can help	LinkedIn Learning
Optional: Google Career Certificates	No, but can help for tech/analytics roles	Coursera, Google

▶ MODULE 09

Beginner Roadmap

- 1 Set up a clean, keyword-optimized LinkedIn profile (see 'Exact Resume Keywords' below).
- 2 Create a Google Sheet to track jobs, contacts, and outreach status.
- 3 Install N8N (free, or via WSK for \$14/mo) or use Poppy AI for workflow automation.
- 4 Learn to use Apify for scraping LinkedIn job posts (no coding required).
- 5 Draft a personalized outreach template (see below).
- 6 Identify 10–20 target companies and hiring managers.
- 7 Automate research and outreach using the tools and scripts in this guide.

▶ MODULE 10

7-Day Action Plan

- 1 Day 1: Update LinkedIn profile headline and summary with target keywords.
- 2 Day 2: Set up a Google Sheet with columns: Company, Job Title, Contact, LinkedIn URL, Status.
- 3 Day 3: Use Apify to scrape 50+ relevant job postings (see 'Insider Secrets').
- 4 Day 4: Research hiring managers using LinkedIn and Perplexity (AI research agent).
- 5 Day 5: Draft and personalize outreach messages for top 10 roles.
- 6 Day 6: Send connection requests and messages; track responses in your sheet.
- 7 Day 7: Follow up with any non-responders; adjust scripts based on replies.

▶ MODULE 11

30-Day Action Plan

- 1 Weeks 1–2: Scale up outreach to 50–100 companies using automation (N8N, Apify, or Poppy AI).
- 2 Week 2: Analyze which messages get the best response; tweak and personalize further.
- 3 Week 3: Use Perplexity or Claude to research company news and tailor your pitch.
- 4 Week 3: Start applying directly on LinkedIn and company sites for roles with no response.
- 5 Week 4: Schedule informational interviews with employees at target companies.
- 6 End of Month: Review your tracker, note which tactics led to interviews, and double down on what works.

▶ MODULE 12

Insider Secrets & Shortcuts

- 1 Automate job scraping: Use Apify to scrape LinkedIn job posts for your target titles and locations. Example: 'Sales Development Representative' search, then scrape with Apify for company, job details, and contact info. (Source: 30-Minute AI Automations, LinkedIn Parasite System)
- 2 Find hidden contacts: Use Perplexity or Claude (via N8N or Poppy AI) to research hiring managers, recent company news, and tailor your outreach to reference specifics (e.g., 'I saw your team just launched X product...'). (Source: Automate Video & Voice Sales Outreach, Multi-Agent Research System)
- 3 Personalized icebreakers: Use AI to generate multi-line, company-specific icebreakers that reference real website or LinkedIn activity, not just generic intros. (Source: 30-Minute AI Automations)
- 4 Track high-intent companies: Scrape companies that are actively hiring for your role, then pitch them directly—even if you're not applying for the posted job. (Source: 30-Minute AI Automations, LinkedIn Parasite System)
- 5 Bypass LinkedIn limits: Use Google Sheets as your outreach database and trigger automations to send messages or emails at scheduled intervals, avoiding LinkedIn's daily connection limits. (Source: Automate Video & Voice Sales Outreach in n8n)
- 6 Leverage viral content: Identify top creators in your niche using Apify, analyze their posts, and engage/comment to get noticed by recruiters and hiring managers in your field. (Source: LinkedIn Parasite System)

▶ MODULE 13

Exact Resume Keywords

- 1 Use job-specific keywords from real LinkedIn postings. Example for Data Analyst: 'SQL', 'Tableau', 'data visualization', 'A/B testing', 'Python', 'business intelligence', 'dashboard',

'data cleaning', 'stakeholder communication'.

- 2 For Sales Development Representative: 'outbound prospecting', 'CRM', 'pipeline management', 'lead generation', 'cold outreach', 'quota attainment', 'B2B sales', 'account research'.
 - 3 For Customer Success: 'client onboarding', 'account management', 'renewals', 'churn reduction', 'customer engagement', 'SaaS', 'support ticketing', 'NPS'.
 - 4 Always match your keywords to the exact phrases used in the job description—AI and recruiters search for these.
-

▶ **MODULE 14**

Copy/Paste Application Script

▶ **MODULE 15**

Interview Talking Points

- 1 Reference a recent company initiative or product launch (use Perplexity/Claude to find specifics).
 - 2 Explain how your skills directly address a pain point mentioned in the job description.
 - 3 Share a brief story of using automation or process improvement in a previous role.
 - 4 Ask about the team's current priorities and how the new hire will contribute.
-

▶ **MODULE 16**

Red Flags / Scams To Avoid

Caution

Beware of 'recruiters' who ask for payment, personal info, or to move the conversation off LinkedIn to WhatsApp/Telegram immediately. Real employers do not require payment for applications or interviews. Avoid job postings with generic company names, no company website, or requests for gift cards or wire transfers. Always verify the company's LinkedIn page and the recruiter's employment history.

► MODULE 17

Source Notes

"Use Apify to scrape LinkedIn job posts and automate your outreach—this is how you get to high-intent companies before everyone else."

THE JOBHACKI ARSENAL

This guide is 1% of what members get

The community unlocks the tools that do the heavy lifting for you:

OmniCut

Upload any video — get back a timestamped, cut-by-cut edit blueprint: hooks, vocal cues, effects and animation calls, all mapped to the viral frameworks behind our own content. You (or your AI editor) just follow the map.

JobHacki Resume Builder

Our exact one-page, recruiter-tested template — auto-built from your LinkedIn in minutes, exported as an editable doc + PDF.

JobHacki Readiness Simulator

Paste any job link. Get tested on what the role actually requires, see your readiness score, and get the fastest study path to close the gaps.

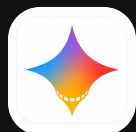

Atlas Directory

Every guide and career path we publish — refreshed by 24/7 AI researchers so you never act on stale info.

Join free today — founding-member pricing locks in before the tools go paid.

WHAT EACH TOOL ACTUALLY DOES

OmniCut

OmniCut watches your entire video the way an elite editor would — every frame, the full transcript, your offer and what you're actually selling — then runs it through the viral frameworks behind our own content. What you get back is a timestamped editing score: your video chopped into 10-second sequences, each with exact vocal cues, audio cues, effect calls and animation directions. Copy a sequence, paste it into Gemini Omni, and generate that cut — then the next, then the next, until the whole edit is done. Runs as a custom GPT inside ChatGPT (you'll need a ChatGPT account), purpose-built for Gemini Omni video editing the day it drops.

JobHacki Resume Builder

Drop in your LinkedIn (or paste your experience) and it rebuilds everything into the exact one-page format we use: tight summary line, education with the details recruiters scan for, metric-driven experience bullets, and the 10-category skills stack that beats ATS keyword filters. Out comes a polished PDF plus a fully editable doc — change any line later without starting over. Single-industry and multi-industry versions included.

JobHacki Readiness Simulator

Paste a real job posting link. The simulator breaks down what that role actually demands — skills, tools, terminology, scenarios — and tests you on it: multiple choice, written answers, even voice roleplay for interviews and sales calls. You get a Readiness Score out of 100 across skill match, tool match, communication and interview readiness, plus the exact study plan to close your gaps — linked straight to the guides, certs and resources that fix them.

Atlas Directory

The full living library: 100+ grounded, step-by-step playbooks across AI businesses, careers, trades, healthcare paths and side income — every one built from people who actually did it, never theory. Our AI researchers monitor hundreds of creators and sources around the clock, so tools, pay data and methods stay current. Search it, filter it, read online or download any guide as a PDF.
