Problem This Business Solves

Who Pays For It

The Offer That Actually Sells

Startup Cost — Real Breakdown

▶ **MODULE 01**

Who This Guide Is For

Operators who want to build a recurring-revenue business by selling AI-powered templates, automations, or plug-and-play systems to local businesses. You don't need to be a coder, but you should be comfortable setting up basic software and talking to small business owners. This is not for job seekers—it's for those who want to run a lean, scalable business with minimal tech overhead.

▶ **MODULE 02**

Business Snapshot

**\$500–
\$5,000/mo/client**

Typical recurring revenue per client (source: multiple operators)

\$0–\$200

Startup cost (using free trials, open-source tools, or low-cost hosting)

1–7 days

Time to first sale (with copy/paste templates and outreach)

**HighLevel: \$78M+
paid out**

Proof of market (affiliate/white-label payouts, source: HighLevel)

▶ **MODULE 03**

Problem This Business Solves

Most local service businesses (plumbers, electricians, therapists, etc.) lose revenue because they miss calls, fail to follow up, or don't have automated systems for booking, reviews, or lead capture. 62% of calls go unanswered (source: AI Marketing Hack). Even businesses paying for ads or SEO often lose leads due to lack of automation. Templates and automations fix these leaks—without requiring the business owner to become a tech expert.

▶ **MODULE 04**

Who Pays For It

Small, independent service businesses: plumbers, electricians, roofers, personal trainers, photographers, massage therapists, counselors, realtors, dentists, auto repair shops, and more. These businesses need more clients and are willing to pay monthly for systems that get them more calls, bookings, and reviews—especially if the setup is fast and hands-off.

▶ **MODULE 05**

The Offer That Actually Sells

The winning offer is NOT a custom website or marketing campaign. It's a plug-and-play system that solves a painful, visible problem (missed calls, lost leads, no reviews). Example: 'We set up a system that answers missed calls, books appointments, and follows up with every lead—no tech skills needed. Free trial, no upfront cost.' This is often bundled as a 'revenue website' or 'AI receptionist' with a recurring monthly fee (\$300–\$500/mo is common; some charge \$1,000+ for more complex automations).

▶ **MODULE 06**

Startup Cost — Real Breakdown

Item	Cost	Notes
n8n hosting (Webspace Kit)	\$5–\$10/mo	Unlimited workflows, open-source
HighLevel SaaS trial	\$0 (30 days)	Free trial, then \$97+/mo if you keep it
Twilio number (for AI phone agents)	\$1–\$5/mo	Required for call automations
HeyGen/AI video tools	Free–\$30/mo	Optional, for video outreach
Domain/email	\$10–\$20/yr	Optional, for professional outreach
AnyMailFinder credits	\$0–\$50	For verified email scraping (optional)

► MODULE 07

Skill Requirements

Skill	Required?	Notes
Basic software setup	Yes	Importing templates, connecting APIs
Client communication	Yes	Email/phone outreach, onboarding
No-code automation	Helpful	n8n, HighLevel, Zapier, etc.
Sales/consulting	Helpful	Explaining value, not hard selling
Coding	No	All workflows/templates are plug-and-play

► MODULE 08

Step-by-Step Launch Plan

- 1 Pick a niche (e.g., plumbers, massage therapists, auto repair).
- 2 Set up n8n (Webspace Kit: \$5/mo) or start a HighLevel free trial.
- 3 Import a ready-made automation template (see @JulianGoldieSEO for 1,000+ n8n templates).
- 4 Configure the template for your niche (swap logos, business name, contact info).
- 5 Test the workflow with your own email/phone to confirm it works.
- 6 Build a list of 50+ target businesses using Google Maps or the HighLevel prospecting tool.
- 7 Send outreach emails offering a free trial or demo (use the script below).
- 8 Onboard your first client and set up their automation.
- 9 Collect recurring payment (Stripe, PayPal, or via HighLevel).
- 10 Rinse and repeat—use the same template for every new client.

▶ MODULE 09

First 7 Days

- 1 Day 1: Set up your automation platform (n8n or HighLevel trial).
- 2 Day 2: Import a plug-and-play template (e.g., AI receptionist, review automation).
- 3 Day 3: Build a lead list of 50+ local businesses using Google Maps.
- 4 Day 4: Personalize your outreach script for your niche.
- 5 Day 5–6: Send 25+ emails and 10+ phone calls (track responses).

- 6 Day 7: Demo the system for any interested business (screen share or phone walkthrough).

▶ **MODULE 10**

First 30 Days

- 1 Refine your outreach based on replies (focus on businesses with <20 reviews or unclaimed profiles).
- 2 Onboard 2–5 clients using the same template (swap branding, connect their calendar/phone).
- 3 Set up recurring billing (Stripe, PayPal, or inside HighLevel).
- 4 Automate follow-up and review requests for each client.
- 5 Collect testimonials and referrals from happy clients.
- 6 Test upsells (see below) with your first clients.

▶ **MODULE 11**

Insider Secrets & Shortcuts

- 1 Use the HighLevel prospecting tool to generate instant marketing audit reports for local businesses—shows them exactly what they're missing (source: The BEST Place to Find Clients).

- 2 Automate your lead scraping with n8n + Apify + AnyMailFinder to pull 100+ business leads from Google Maps into a Google Sheet in minutes (source: How I Extracted 100+ Leads from Google Maps Using AI Agent).

- 3 Copy/paste proven outreach scripts: 'Did you know 62% of [industry] miss calls and most customers don't leave voicemails? I have a free trial of a tool that handles missed

calls, books appointments, and follows up automatically.' (source: How to Get Paid Every Month...)

- 4 Don't build custom websites—use the same template for every client, just swap logo/business name/services. Hire a VA for \$50 to do this if needed (source: How I Sign Local Business Clients With ONE Simple System).
- 5 Focus on businesses with <20 Google reviews or unclaimed profiles—they're the most likely to need your help and respond to outreach (source: The BEST Place to Find Clients).
- 6 If you use n8n, Webspaces Kit offers \$5/mo hosting with 100+ free workflow templates—no need to build from scratch (source: Website Learners, multiple videos).

▶ **MODULE 12**

How To Find Your First Customers

- 1 Search Google Maps for your target niche and city (e.g., 'plumber Los Angeles').
- 2 Click 'More businesses' to see the full list, not just the top 3.
- 3 Look for businesses with few reviews, unclaimed profiles, or missing info.
- 4 Use n8n + Apify + AnyMailFinder to scrape contact info for 50–100 businesses.
- 5 Send personalized emails offering a free trial or demo.
- 6 Follow up by phone for higher response rates.

▶ **MODULE 13**

Copy/Paste Outreach Script

▶ **MODULE 14**

Pricing Model

Model	Typical Price	Notes
Monthly recurring (most common)	\$300– \$500/mo	For basic automation (AI receptionist, reviews, booking)
Setup fee (optional)	\$0–\$500	Some charge a one-time onboarding fee
White-label SaaS	\$97–\$497/mo	If reselling HighLevel or similar
Custom automations	\$1,000+/mo	For advanced or multi-system setups

► MODULE 15

Upsell Ideas

- 1 Google review automation (\$100–\$200/mo extra): Set up auto-texts after each job to request reviews (source: How I Sign Local Business Clients...).
- 2 AI video outreach (\$200–\$500/mo): Use HeyGen to send personalized video follow-ups to leads (source: How I Built an AI Clone...).
- 3 WhatsApp AI agent (\$100–\$300/mo): Set up a WhatsApp bot for customer support or bookings (source: How I Built a WhatsApp AI Agent...).
- 4 Lead generation campaigns (\$500–\$2,000/mo): Run Google/Facebook ads and automate lead follow-up using the same system.
- 5 Social media content automation (\$200–\$500/mo): Use ChatGPT + DALL-E + Metricool to auto-generate and schedule posts.

► MODULE 16

Risks / Legal / Compliance

Red Flags

Don't promise guaranteed results or income—many clients will see improvements, but some may not. Always comply with local telemarketing and data privacy laws (e.g., TCPA for calls/texts in the US, GDPR in Europe). If using AI to answer calls or send messages, disclose this to clients and their customers. Some SaaS platforms (like HighLevel) require you to follow their reseller/affiliate terms—read them before selling.

► MODULE 17

Source Notes

“This is one of my actual templates. Phone number you can tap on mobile right at the top, quote form there, chat widget in the corner. Every one of these captures a lead and sends it to a text conversation on the business owner's phone. And I've got these kind of website templates for all kinds of different industries. So, I just use the exact same layout every time, and then I just swap out the logo, the business name, and the services. That's it. Takes less than an hour, or you can hire a virtual assistant to do it for about 50 bucks.”

THE JOBHACKI ARSENAL

This guide is 1% of what members get

The community unlocks the tools that do the heavy lifting for you:

OmniCut

Upload any video — get back a timestamped, cut-by-cut edit blueprint: hooks, vocal cues, effects and animation calls, all mapped to the viral frameworks behind our own content. You (or your AI editor) just follow the map.

JobHacki Resume Builder

Our exact one-page, recruiter-tested template — auto-built from your LinkedIn in minutes, exported as an editable doc + PDF.

JobHacki Readiness Simulator

Paste any job link. Get tested on what the role actually requires, see your readiness score, and get the fastest study path to close the gaps.

Atlas Directory

Every guide and career path we publish — refreshed by 24/7 AI researchers so you never act on stale info.

[Join the JobHacki Community →](#)

Join free today — founding-member pricing locks in before the tools go paid.

WHAT EACH TOOL ACTUALLY DOES

OmniCut

OmniCut watches your entire video the way an elite editor would — every frame, the full transcript, your offer and what you're actually selling — then runs it through the viral frameworks behind our own content. What you get back is a timestamped editing score: your video chopped into 10-second sequences, each with exact vocal cues, audio cues, effect calls and animation directions. Copy a sequence, paste it into Gemini Omni, and generate that cut — then the next, then the next, until the whole edit is done. Runs as a custom GPT inside ChatGPT (you'll need a ChatGPT account), purpose-built for Gemini Omni video editing the day it drops.

JobHacki Resume Builder

Drop in your LinkedIn (or paste your experience) and it rebuilds everything into the exact one-page format we use: tight summary line, education with the details recruiters scan for, metric-driven experience bullets, and the 10-category skills stack that beats ATS keyword filters. Out comes a polished PDF plus a fully editable doc — change any line later without starting over. Single-industry and multi-industry versions included.

JobHacki Readiness Simulator

Paste a real job posting link. The simulator breaks down what that role actually demands — skills, tools, terminology, scenarios — and tests you on it: multiple choice, written answers, even voice roleplay for interviews and sales calls. You get a Readiness Score out of 100 across skill match, tool match, communication and interview readiness, plus the exact study plan to close your gaps — linked straight to the guides, certs and resources that fix them.

Atlas Directory

The full living library: 100+ grounded, step-by-step playbooks across AI businesses, careers, trades, healthcare paths and side income — every one built from people who actually did it, never theory. Our AI researchers monitor hundreds of creators and sources around the clock, so tools, pay data and methods stay current. Search it, filter it, read online or download any guide as a PDF.
