YOU WILL LEARN

- ✓ Who This Guide Is For
- ✓ Problem This Business Solves
- ✓ The Offer That Actually Sells
- ✓ Business Snapshot
- ✓ Who Pays For It
- ✓ Startup Cost — Real Breakdown

▶ **MODULE 01**

Who This Guide Is For

Operators, small agencies, and solo creators who want to build a scalable business producing UGC (user-generated content) ads for brands—using AI, freelance, or hybrid workflows. This guide is for those who want to sell UGC as a service, not just land a job as a creator.

▶ MODULE 02

Business Snapshot

\$1–\$1,000+ per ad

Typical client price (source: YouTube, X posts)

\$10–\$100 startup

AI tools & first ad costs (Arcads, Fiverr)

Same-day to 1 week

Turnaround for first deliverable

Proof: \$100k+/mo

Operators replacing agencies (see @davidfigeira, @georgestock)

▶ MODULE 03

Problem This Business Solves

Brands need authentic, high-converting video ads for TikTok, Facebook, and Instagram—fast, cheap, and at scale. Traditional UGC creators and agencies are slow (2+ weeks), expensive (\$80–\$1,000+ per ad), and often unreliable (missed deadlines, inconsistent quality). AI-powered UGC solves speed, cost, and volume bottlenecks.

▶ MODULE 04

Who Pays For It

Direct-to-consumer (DTC) brands, e-commerce stores, SaaS startups, and marketing agencies. Typical buyers are performance marketers, brand managers, or founders who need dozens of ad variations monthly.

▶ MODULE 05

The Offer That Actually Sells

What sells: Bundled UGC ad packages (e.g., 10 TikTok-style videos for \$250–\$500), rapid delivery (24–72 hours), unlimited revisions, and the ability to test multiple actors/demographics. AI-generated or hybrid (AI + human) UGC at a fraction of agency prices. Example: '10 custom UGC ads in 48 hours, unlimited actors, \$199 flat.'

▶ MODULE 06

Startup Cost — Real Breakdown

Item	Cost (USD)	Notes
Arcads AI subscription	\$10–\$39/mo	Entry-level plan sufficient for first clients
Fiverr UGC creator (optional)	\$80– \$150/ad	For hybrid/portfolio samples
Collabster premium creator (optional)	\$1,000/ad	For high-end samples (not required)
Product sample (if needed)	\$0–\$50	Many clients provide assets/images
Basic editing software	\$0–\$20/mo	CapCut, Canva, or included in Arcads

Skill Requirements

Skill	Level Needed	How to Learn
Scriptwriting (UGC format)	Basic	Follow Arcads' hook-problem-solution-CTA framework
AI video generation	Beginner	Arcads tutorials (YouTube: 'How to Make Viral AI UGC for TikTok Ads')
Ad creative strategy	Intermediate	Study winning TikTok/Facebook ads, use Arcads' auto-research
Client communication	Basic	Email, Loom, or Slack
Basic video editing	Beginner	CapCut, Canva, or Arcads built-in editor

Step-by-Step Launch Plan

- 1 Sign up for Arcads AI (arcads.com) and familiarize yourself with the dashboard.
- 2 Create 3–5 UGC ad samples using Arcads' built-in script generator and actors. Use a real or demo product (e.g., blender, face roller).
- 3 Test different script angles: pain point, honest review, demo, daily routine (see Arcads auto-prompts).
- 4 Export finished videos and build a simple portfolio (Google Drive, Notion, or a one-page site).

- 5 Set up a business email and outreach tracker (Google Sheets).
- 6 Identify 20–50 DTC brands spending on TikTok/Facebook ads (use Meta Ad Library, TikTok Creative Center).
- 7 Send personalized outreach with a sample video relevant to their niche.
- 8 Offer a discounted bundle (e.g., 3 ads for \$29) for first-time clients.
- 9 Collect testimonials and permission to use delivered ads as proof.
- 10 Iterate based on client feedback and scale up outreach.

▶ **MODULE 09**

First 7 Days

- 1 Day 1–2: Create 3 UGC ad samples in Arcads (different products, actors, and angles).
- 2 Day 3: Build a portfolio folder and write a short case study for each sample.
- 3 Day 4: Research 20 brands in your niche using Meta Ad Library.
- 4 Day 5–6: Send 20 personalized outreach emails with a relevant sample attached.
- 5 Day 7: Follow up with all non-responders and offer a fast-turnaround bonus (e.g., 'Your first ad in 24 hours').

▶ **MODULE 10**

First 30 Days

- 1 Deliver at least 5 paid UGC ads to real clients (even at break-even pricing).
- 2 Test at least 3 script frameworks: Arcads' hook-problem-solution-CTA, honest review,

- 3 Build a testimonials reel from delivered ads.
- 4 Expand outreach to 100+ brands, including agencies and SaaS companies.
- 5 Experiment with upsells: multiple actors, A/B script testing, or TikTok/Facebook ad management.
- 6 Refine your workflow for speed: batch generate scripts, actors, and edits in Arcads.
- 7 Track your time and cost per ad to optimize pricing and margins.

▶ **MODULE 11**

Insider Secrets & Shortcuts

- 1 Use Arcads' 'add speech emotion' button to inject conviction and emotion into AI actors—makes ads feel less robotic (see 'How to Make Viral AI UGC for TikTok Ads').

- 2 Always include the line 'I want different types of ads for this product' in your Arcads prompt—this triggers multiple high-converting script angles in one click (from 'How To Make Facebook Ads With AI').

- 3 Sort Arcads actors by 'newly added' to get the freshest, least-used faces for your clients' ads—avoids the 'everyone uses this actor' problem.

- 4 Fine-tune voice settings: lower stability to 0.3 and increase style exaggeration to 0.4 for more natural, varied delivery (see Amy voice settings in transcript).

- 5 For hybrid portfolios, buy a \$100 Fiverr UGC ad and a \$10 Arcads AI ad for the same script—show clients a side-by-side to prove value (from 'I Paid \$10, \$100 & \$1,000 for UGC Ads').

- 6 If a client wants a specific demographic or setting, use Arcads' actor filters (skin tone, age, emotion, background) to match exactly—no need to hire multiple freelancers.

How To Find Your First Customers

Target DTC brands running TikTok/Facebook ads (search Meta Ad Library, TikTok Creative Center). Look for brands with frequent creative refreshes or those using obvious UGC. Outreach to performance marketers, founders, or agencies managing multiple brands. LinkedIn, X (Twitter), and cold email are the top channels.

Copy/Paste Outreach Script

Pricing Model

Package	Price (USD)	Details
Single UGC ad	\$10–\$100	AI or hybrid, 1 actor, 1 script
5-ad bundle	\$49–\$250	Mix of actors/scripts, 48hr delivery
10-ad bundle	\$199–\$500	Multiple angles, unlimited revisions
Agency retainer	\$500–\$2,000/mo	20–50 ads/month, priority support

Upsell Ideas

1 [@icki.com](https://icki.com) · @igbacki
A/B script testing: deliver 3–5 script variations per product.

- 2 Multiple demographics: offer ads with different age, gender, or ethnicity actors.
- 3 Ad management: run and optimize TikTok/Facebook campaigns for clients.
- 4 Captioned/styled edits: add branded captions, effects, or voiceovers.
- 5 Monthly creative refresh: recurring package for new ads every week.

▶ **MODULE 16**

Risks / Legal / Compliance

Red Flags & Legal Risks

Some brands may require real human creators for compliance or authenticity—always disclose if using AI actors. Avoid using AI likenesses of real people without permission. Respect platform ad policies (TikTok, Meta) regarding synthetic media. Always get written approval for ad usage and testimonials.

▶ **MODULE 17**

Source Notes

“With Arcads, you can literally create up to 100 ads just like this one for the price of a single \$1,000 video without needing to ship products to creators, wait weeks just to get the first video back, and then even more for revisions.”

THE JOBHACKI ARSENAL

This guide is 1% of what members get

The community unlocks the tools that do the heavy lifting for you:

OmniCut

Upload any video — get back a timestamped, cut-by-cut edit blueprint: hooks, vocal cues, effects and animation calls, all mapped to the viral frameworks behind our own content. You (or your AI editor) just follow the map.

JobHacki Resume Builder

Our exact one-page, recruiter-tested template — auto-built from your LinkedIn in minutes, exported as an editable doc + PDF.

JobHacki Readiness Simulator

Paste any job link. Get tested on what the role actually requires, see your readiness score, and get the fastest study path to close the gaps.

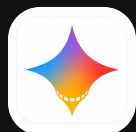

Atlas Directory

Every guide and career path we publish — refreshed by 24/7 AI researchers so you never act on stale info.

Join free today — founding-member pricing locks in before the tools go paid.

WHAT EACH TOOL ACTUALLY DOES

OmniCut

OmniCut watches your entire video the way an elite editor would — every frame, the full transcript, your offer and what you're actually selling — then runs it through the viral frameworks behind our own content. What you get back is a timestamped editing score: your video chopped into 10-second sequences, each with exact vocal cues, audio cues, effect calls and animation directions. Copy a sequence, paste it into Gemini Omni, and generate that cut — then the next, then the next, until the whole edit is done. Runs as a custom GPT inside ChatGPT (you'll need a ChatGPT account), purpose-built for Gemini Omni video editing the day it drops.

JobHacki Resume Builder

Drop in your LinkedIn (or paste your experience) and it rebuilds everything into the exact one-page format we use: tight summary line, education with the details recruiters scan for, metric-driven experience bullets, and the 10-category skills stack that beats ATS keyword filters. Out comes a polished PDF plus a fully editable doc — change any line later without starting over. Single-industry and multi-industry versions included.

JobHacki Readiness Simulator

Paste a real job posting link. The simulator breaks down what that role actually demands — skills, tools, terminology, scenarios — and tests you on it: multiple choice, written answers, even voice roleplay for interviews and sales calls. You get a Readiness Score out of 100 across skill match, tool match, communication and interview readiness, plus the exact study plan to close your gaps — linked straight to the guides, certs and resources that fix them.

Atlas Directory

The full living library: 100+ grounded, step-by-step playbooks across AI businesses, careers, trades, healthcare paths and side income — every one built from people who actually did it, never theory. Our AI researchers monitor hundreds of creators and sources around the clock, so tools, pay data and methods stay current. Search it, filter it, read online or download any guide as a PDF.
